IN THE SPECIFICATION

Please insert the following new paragraph after the paragraph ending on page 18 line 21 (that ends with "priority of the broadcasting client's print job"):

Thus, if a response is received, it may include no objection, an objection to despooling print data to the printing device(s), and/or an indication of a conflict to despooling print data to the printing device(s). The client receiving the response may determine whether the response includes a conflict from another client computer device to despooling the print data to the printing device(s) and, if a conflict is indicated in the response, the conflict may be resolved before despooling print data to the printing device(s). Similarly, the client receiving the response may determine whether the response includes an objection from another client computer device to despooling the print data to the printing device(s) and, if an objection is included in the response, the objection may be resolved before despooling print data to the printing device(s).
